

Polishing Unpolished Granite Edges

Q. I have already installed and grouted 12x12 granite for my kitchen counter top, BUT how do I polish the edge like the top (or at least close to). It seems to be a secret, I cannot find how to from the net. Please help! Thank you so much!

A. This is a job for a pro. The cost of the diamonds and the polishing equipment may end up costing you more than having it professionally done. If you do decide to have a pro do it, [contact us](#) for recommendations.
