

What would be a suitable color enhancer for my honed black granite tiles?

Q. What would be a suitable color enhancer for my honed black granite tiles?

A. Brian Yager (<http://www.desertstonecare.com>) who we consider to be an expert in color enhancing suggests one of two products as a color enhancer: Enrich and Seal from Aqua Mix or Tenax Ager. He suggests that you check Lowes or Monterey Tile or any high end tile shop.
