

## **I just had my honed travertine floors installed last week and I do not want a very glossy finish. How long does the enhancer last?**

**Q.** I just had my travertine floors installed last week, is honed finished, but I do not want a very glossy finish. How long does the enhancer last?

**A.** How long the color enhancer lasts depends on how much traffic it sees and how it is cleaned and maintained on a regular basis. All in all, a flat honed floor will remain in it's original state longer than a regular honed floor or even a regular honed travertine floor with color enhancer. The travertine will not absorb much of the color enhancer and will leave you needing to re-apply frequently as it will sit on the surface and wear off quickly. Read more information about [travertine surfaces here.](#)
