

I have travertine floors installed in my house and I need to know what is the best way to go with polishing this type of floors?

Q. I have travertine floors installed in my house and I need to know what is the best way to go with polishing this type of floors?

A. How old is the installation and is the finish polished or a hone finish? In all honesty, you could try the color enhancer, but you would probably be much happier in the long run if you had the floor polished/flattened.
