

Is there a low cost option to repair my marble table top?

Q. Is there a low cost option to repair my etched marble table top or do I have to have the whole (huge) surface sanded and re polished?

A. If the etch is very deep you may have to call in a restoration professional. However, before you do that, you should try to repair it yourself with a high quality marble etch remover. Ask your professional stone and tile restoration contractor for recommendations. If you do not yet have a PRO, [contact us](#).
